MB	6251			08 November 1954	Cable Rack (Modified)		
	6252	0			It was Reading Drawing Office practice to add issue letters after an up issue of a drawing. For some reason this did not happen with the 6252 series. The drawings were reissued, without an up issue letter. In some cases the part shown on the drawing was not on the same on the up issue version, but rather the part on the original issue is on a different / number. Listed below are both the original drawings shown as issue "1" in this list, followed by the up issue shown as issue "2". Numbers are used to avoid confusion with the Reading issue letters. Apart from issue one having a red pencil line(s) drawn through it there is nothing to indicate on the later drawings that they are later issues.
